Post subject: Advanced Username Color mod for RN

This is the AUC mod for RavenNuke. It should work fine, but be sure to test it on a test site and make sure you back your site up before you start any mod.

There is an error in the download. I have fixed it and reuploaded it. The change that needs to be made is in modules/Forums/includes/page_header.php

find

```
define('COLORS', $stable_prefix .'bbadvanced_username_color');
```

and change to

```
define('COLORS', $prefix .'_bbadvanced_username_color');
```
